

NAFSA Economic Contribution Reconciliation

The current NAFSA page exposes a Power BI national-trend report whose returned rows begin with the 2014 label, corresponding to **2014/15**, and end with the 2024 label, corresponding to **2024/25**. An unfiltered read-only query of that report did not reveal earlier annual rows, so the clean current-tool range used for the CSV is **2014/15–2024/25**.

For the **economic-contribution** field, the CSV uses the amount published to one decimal place in billions (converted to USD integers with trailing zeroes), as requested. For **jobs**, it uses the exact count in the contemporaneous NAFSA national PDF or press release where that count is published. This is preferable to using the small, later revisions visible in the current Power BI trend data because the user specifically requested source notes tied to annual releases/pages.

Academic year	CSV contribution	CSV jobs	Principal source and reconciliation decision
2014/15	30,500,000,000	373,383	NAFSA Nov. 16, 2015 release publishes \$30.5B and “more than 373,000 jobs” ; current Power BI trend data supplies 373,383.
2015/16	32,800,000,000	400,844	NAFSA Nov. 14, 2016 release (via PR Newswire) publishes \$32.8B and “more than 400,000 jobs” ; current Power BI trend data supplies 400,844.
2016/17	36,900,000,000	450,331	NAFSA Nov. 13, 2017 release publishes \$36.9B and “more than 450,000 jobs” ; NAFSA May 9, 2018 blog gives 450,331.
2017/18	39,000,000,000	455,622	NAFSA Nov. 13, 2018 release.
2018/19	40,500,000,000	458,290	Current NAFSA Power BI trend series rounds to \$40.5B; the original

			NAFSA ISEV 2019 national PDF instead displays \$41.0B and 458,290 jobs. The \$40.5B selection follows the requested sample and current tool series; the source note will disclose the revision.
2019/20	38,700,000,000	415,996	NAFSA ISEV 2020 national PDF and Nov. 16, 2020 release.
2020/21	28,400,000,000	306,308	NAFSA Nov. 15, 2021 release.
2021/22	33,800,000,000	335,423	NAFSA EconValue-2022 national PDF and Nov. 14, 2022 release.
2022/23	40,100,000,000	368,333	NAFSA EconValue-2023_final national PDF and Nov. 13, 2023 release.
2023/24	43,800,000,000	378,175	NAFSA EconValue2024 national PDF and Nov. 18, 2024 release.
2024/25	42,900,000,000	355,736	NAFSA EconValue2025 national PDF and Nov. 17, 2025 release.

Tool-interface finding

The original NAFSA page has a **View Reports** toggle and a direct national PDF. It has no visible academic-year selector or dedicated CSV/XLSX export/download button. The embedded Power BI trend report contains a **Select State** dropdown, rather than a year selector, and its current public dataset has rows only from 2014/15 onward. The report metadata permits Power BI's standard visual export-data mode, but no dedicated public bulk-download control was exposed in the page interface.
